***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 02-21-2006 has been entered.

***Allowable Subject Matter***

Applicant is advised that the Notice of Allowance mailed on 01-10-2006 is vacated due to the filing of an RCE. An action based on a new reference submitted in an IDS on 02-21-2006 will follow. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 3731

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 48,50,52,62-65 and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by Morris, et al.-2004/0249394.

Morris discloses a suture advancing means- 20,70, a straightening means 18, grasping means 3,4 attached to the straightening means. Wherein the advancing means directs the suture through soft tissue while the grasping means stabilizes the device relative to the tissue. The grasping means includes one movable and one stationary jaw. Both jaws have openings for receiving the needle therethrough. Fig. 53-56 show the opening on the movable jaw as being open to allow lateral release.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 53-61 and 66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morris, et al.-'394 in view of Klein-4491135 and Smith, et al.-5797961.

Morris discloses the invention as claimed with the exception of the needle having an opening receiving the suture. However, Klein discloses that it was known to provide suturing needles with either an eyelet or swaging attachment. It would have been obvious to attach the suture to the needle by eyelet or swaging- which also requires an opening (see Smith element 25 or 27.) as this provides a known alternative attachment location or means for the suture to the needle.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 02-21-2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.
